SKILLS

- Technical writing and Research
- Problem-solving skills
- Good team player
- Attention to detail
- Excellent communication
- Project management
- Leadership and organization

CERTIFICATION

- Microsoft Certified Professional (MCP)

SUMMARY

A highly skilled Full-Stack Software Developer with 5+ years of experience, earned an MSc. Software Engineering from the UK. I am seeking an opportunity to work on different projects in an excellent work environment, to collaborate and be part of a multicultural team. Eager to develop applications and tools for data sharing platforms, and software systems that meet users' requirements, that are easy to use, easier to modify, and perform flawlessly.

WORK EXPERIENCE

Full-Stack Software Developer
First Samone/Luday AB, Sweden (Feb 2022 - Apr 2024)

- Designed and developed software systems for commercial clients including ecommerce websites using Python/React.js.
- Collected users' requirements, designed new features, wrote reliable and efficient code. Worked closely with stakeholders and team members to ensure high quality and user satisfaction.
- Managed projects from initial concept through deployment and maintenance, ensuring on-time and on-budget delivery
- Coordinated and orchestrated projects, responsible for the software design, led three software teams, performed code reviews, provided feedback, and mentored interns to success.

Senior Software Developer/Instructor
ICA Specs, Ltd., Nigeria (Jan 2014 - Dec 2018)

- Our team of four developers designed and developed a robust school software (OSIMS), we also completed a Health software (HISA), and I mentored intern software developers.
- Senior Programming Instructor - Web Design, PHP, and Python

Software Developer (Short term contract)
FHI 360, Abuja, Nigeria (Aug 2015 - Nov 2015)

- Extended the features of iHRIS health software; added Training and Calendar modules for M&E Department.

Web Developer
GCL Hub, Lagos, Nigeria (Jul 2013 - Mar 2014)

- Planned, designed, developed, tested, and deployed websites for clients, and for GCL at https://gclhub.com

MSC. DISSERTATION TOPIC

- Use of Software Design to Develop an Airline Service Application for Travelers (Published in 2013)
